Professional Summary

Software Engineer with experience in Angular 21, TypeScript, RxJS, NgRx, and Micro Frontend (MFE) architecture, developing responsive web applications and reusable UI components. Experienced in RESTful API integration and Spring Boot backend services, with hands-on knowledge of JWT-based authentication, unit testing using Jasmine and Karma. Skilled in Agile software development, debugging, defect resolution, and delivering maintainable web solutions across the application stack.

Technical Skills

Frontend: Angular 21, TypeScript, RxJS, NgRx, JavaScript, HTML5, CSS3, Bootstrap
Backend: Java, Spring Boot, REST APIs, RESTful APIs, Node.js, Express.js
Databases: MySQL, MongoDB, JPA/Hibernate
Tools: Git, GitHub, npm, VS Code, Visual Studio, Linux/Unix
Concepts: Micro Frontend (MFE), Microservices Architecture, State Management, Lazy Loading, Change Detection, Dependency Injection, JWT Authentication, API Integration, Pagination, Agile/Scrum

Work Experience

Accenture – Packaged App Development Associate (PADA) Nov 2024 – Present

- Maintained Angular Micro Frontend (MFE) applications on the MyISP platform, supporting multiple business workflow modules used by different internal teams.
- Architected reusable UI components with RxJS operators and NgRx, applying Angular Signals for optimized change detection and cutting duplicate component development time by an estimated 10%.
- Integrated RESTful APIs across a microservices-based backend, improving UI responsiveness through reactive programming and reducing page load latency by 20%.
- Automated unit testing coverage using Jasmine and Karma, increasing test coverage from 0% to 99% across release cycles.
- Enhanced backend request-handling performance in Java and Spring Boot, resolving API-level defects per sprint.
- Implemented lazy loading and dependency injection best practices across Angular MFE modules, reducing initial bundle load time and improving maintainability.
- Adopted AI-assisted development workflows (GitHub Copilot, AIDC Pack), reducing feature implementation time by an estimated 30%.
- Drove Agile sprint delivery across sprints, resolving defects and supporting production deployments.

FindInbox.Limited – Web Developer Intern Nov 2023 – Jan 2024

- Developed web application modules for student assessment workflows using Angular, serving active users.
- Integrated REST APIs and implemented state management, reducing assessment data load time by 15%.
- Built analytics dashboards adopted by 100+ instructors, improving usability and performance-tracking visibility

Projects

StudyMate.AI – Angular, Spring Boot, Gemini AI, MySQL, JWT Live Demo

- Integrated **Gemini AI** with document-processing workflows to generate context-aware responses and automate **AI-driven quiz generation**, supporting scoring, attempt tracking, and persistent quiz history through MySQL.
- Implemented SHA-256 client-side hashing, eliminating duplicate uploads and reducing redundant storage by 19%.
- Automated quiz generation with scoring, attempt tracking, and persistent quiz history using MySQL.
- Secured role-based access with JWT authentication, route guards, and HTTP interceptors across user.
- Designed Spring Boot REST APIs with JPA/Hibernate and MySQL, handling PDF sessions and Q&A records, and deployed the application using **Vercel** and **Railway**

AI-Powered Pizzeria – MEAN Stack (Angular, MongoDB, Express.js, Node.js) Live Demo

- Engineered a AI-powered pizza assistant supporting 5 AI capabilities: natural-language ordering, menu matching, ingredient validation, cart actions, conversational order processing.
- Created a Smart Meal Builder enabling personalized pizza composition through dynamic ingredient selection, custom combinations, and real-time price calculation across the available menu.
- Orchestrated AI-driven order processing with intent handling, menu availability checks, validation, and automatic cart updates, connecting conversational requests to the ordering workflow.
- Delivered the full-stack solution with reusable UI architecture reducing code duplication by 50% and cloud deployment through Vercel, Render, and MongoDB Atlas.

NewsApp – MEAN Stack (Angular, MongoDB, Express.js, Node.js)

- Built a news aggregation platform integrating external REST APIs for category-based content delivery.
- Modeled MongoDB data models for user preferences, bookmarks, with API-driven filtering workflows.
- Engineered Angular routing and real-time search, reducing content lookup time by an estimated 20%, improving cross-device browsing consistency.

Education

JSS Academy of Technical Education, Bangalore	2020 – 2024
B.E. in Computer Science	CGPA: 8.6
Class 12, Assam Board	2018
Class 10, Assam Board	2016

Certifications

Microsoft GitHub Copilot Certification (2024)
HackerRank Certifications: Data Structures
The Web Developer Bootcamp – Colt Steele (2023)

Recognition & Awards

Star of the Month Award, Accenture Feb 2026
Recognized for contribution to Angular micro-frontend development within MyISP workflow modules.

TechWeek Stars – Wall of Fame Recognition, Accenture Dec 2025
Recognized for technical contribution within Asset Engineering Hub (mySPDU – mySP and Analytics).

Tech Expressway Program – Stream Training Excellence Recognition, Accenture Dec 2025
Recognized for successful completion of stream-level capability milestones under the Tech Expressway Program.
